## Why Promat is the Leader in Animal Comfort

Since inventing the original Pasture Mat in 1991, our research and development team has never stopped looking for new and better solutions.

These include:

- The Pack Mat™, which reduces sand usage by up to 70%
- The Poly Pillow™, which indexes the cow to help keep the stall clean and helps avoid injuries while rising
- The Premium Pad™, a high density foam layer that keeps the cover smoother and easier to clean, while giving the cow more traction.

And, of course, there is now the most impressive addition to our line-up of animal comfort products: GELMAT DS featuring Comfort Control System.

### GELMAT DS - Our Best Made Even Better

Our track record speaks for itself. So, too, does initial reaction from the farms testing the new GELMAT DS. As one farmer put it, “any new mats we install will be these.”

### Introducing GELMAT DS with Comfort Control - A new revolution in Cow Comfort

You know that, the more you keep your cows rested and comfortable, the more they produce for you. Which is why our engineers set out to make the best cow comfort solution ever developed.

The result: GELMAT DS with Comfort Control that allows you to set the firmness of the mattress. You can control cow comfort depending on your herd type. Whether they be Jerseys, heifers, or 2nd or 3rd lactation cows, keep them all in a state of constant, ultimate comfort.

The DS stands for Drop Stitch — making this gel-filled mattress not only the ultimate in comfort, but also the most durable solution you'll find. Your cows will not want to get off this smooth, supportive surface that contours to their bodies. And GELMAT DS is compatible with both free and tie stalls.

#### What's In It for Your Herd:

- Greater comfort
- Greater support
- Relief of pressure points
- Fewer hock sores
- A cleaner stall

#### What's In It For You:

- Set comfort level depending on herd type
- Less bedding required
- Easy to clean surface
- Less stall maintenance
- Reduced vet bills

### Greater Comfort. Greater Durability. Less Work For You.

You want your herd to be at rest — more comfortable for longer periods. You want a solution that can last for years to come, reduce your labour time and expenses. In other words, you want GELMAT DS — featuring Comfort Control System.

*The Leader in Animal Comfort*

## What is Comfort Control System?

It is our patent pending air system which assures that your GELMATS will always keep your cows content and relaxed. Comfort Control was developed to maximize cow comfort all the time, allowing you to adjust the level of inflation to account for a heavier or lighter herd type.

Air tubes connecting a row of mats remain connected to a regulator and air tank, so adding a little air when required couldn't be easier.

Most importantly, new Gelmat DS with Comfort Control System works to provide greater comfort — and all the benefits that come with it.

“My veterinarian commented on less hock sores.”

“Milk production went up by more than 4kg per cow per day.”

“Cows lie down longer.”
